Notice is hereby given that the Final Supplemental Environmental Impact Report (FSEIR) for the Kings River Sand and Gravel project, Unclassified Conditional Use Permit (U)CUP No. 3052 has been completed and is available for review. This new (U)CUP application would replace expired (U)CUP Application No. 2765, for which a Final Environmental Impact Report (FEIR) was certified in 1999 pursuant to the California Environmental Quality Act (CEQA).

Calaveras Materials Incorporated (CMI) is proposing a sand and gravel (aggregate) extraction and processing facility, ready-mix concrete plant, and associated reclamation plan. A total of 315 acres of the 457 acre site is proposed for mining. The project proposes an annual production of one (1) million tons of aggregate per year. The Kings River Sand and Gravel project site is located in an unincorporated area of south-central Fresno County, California, southeast of the cities of Fresno and Sanger. The project site consists of an irregularly shaped area of 457 acres bounded by Goodfellow Avenue on the north, Cameron Slough on the east, the Kings River on the south, and the Riverbend Alignment on the west.

The FSEIR is comprised of two documents, the Draft SEIR and the Response to Comment document.
